With 11+ years as a SAP Solution Architect, I've led implementations and rollouts across SAP EWM, S/4HANA, ECC, and CRM. My core expertise is warehouse management, backed by strong order-to-cash (OTC) process knowledge and technical proficiency in ABAP and Fiori. I've delivered solutions across mining, railway, IT services, and trading industries, combined with strong communication, consulting, and leadership abilities.

WORK EXPERIENCE

Solution Architect — EWM — Solar Group

Jul 2023 – Present

Vejen, Denmark · Sourcing and services company

- Led the implementation of a new automated warehouse, consolidating operations from two existing sites — bringing together Autostore for small-goods automation, Honeycomb's cassette management system for long goods, STILL's iGo Flow for AGV/AMR/VNA pallet automation and iGo Pilot for PXVs, and Kardex Shuttle for cable goods.
- Led the migration from Decentralized EWM 9.5 to Decentralized EWM on S/4HANA (RISE, Private Cloud Edition).
- Led development of a Fiori **warehouse cockpit** giving real-time inbound and outbound visibility across multiple warehouses from a single view.
- EWM Architect for **SmartKit Orders** — a Solar webshop feature letting customers order pre-packed, project-specific material kits. Designed the EWM fulfillment side: picking and packing materials into a single labeled kit per order.
- Currently leading tailored and flexible night delivery options; contributing to the migration from SAP PI/PO to Integration Suite.
- Contributed to the migration from ECC to S/4HANA (on-premise).
- Delivered AGV pallet automation and Kardex cable-goods handling at an earlier site, dispatch-area automation (parcel sorting, robotic picking), nShift (Transportation Management System) upgrades, and new features and performance optimizations across the warehouse's Fiori applications.

Specialist — Package Implementation — LTI

Jun 2015 – May 2023

India & Denmark · Business Services (Trading, Consulting, Railway, Mining)

- Played a pivotal role in creating a **Global Template** for warehouse operations in the Nordic region. Designed and developed 10 comprehensive Fiori applications for diverse warehouse processes. Automated Goods Receipt, Picking, Day Closing, and Returns, managing a daily volume of 90,000+ lines across six warehouses. Integrated third-party robotic systems (Autostore, Unicontrol, Prevas) for automated picking and putaway of small goods.
- As a key player in SAP S/4HANA implementation for the IT Services industry, crafted solutions to address complex needs in contract processing, billing, and financial analysis. Work included solutions for intricate invoice splitting, merging, and facilitated revenue, tax, and GST analysis.
- Led the CRM implementation for a Railway client, emphasizing solution design, user training, and achieving high customer feedback. Built a centralized case-communication feature for the Vigilance department — a single thread where different departments could log updates on a case — along with simplified configurations.
- Created a tailored **Order Entry Workbench** for the Trading industry, streamlining order placement with a 360° customer view, including open orders, deliveries, credit history, and outstanding balances. Implemented alerts for follow-ups and receivables control, along with an add-to-cart feature using product recommendations from ordering history.
- Worked as OTC techno-functional in SAP ERP implementation in Mining, designing and developing SAP GUI-based applications for Material Sampling, Bank Guarantee, and Supplementary Billing. Offered solutions for cash discounts and intricate rounding off in billing, while also developing complex SMARTFORMS in SD & MM areas.

SKILLS

Business Analysis · Warehouse Design · Goods Movement · Inbound and Outbound Logistics · Handling Units & Packaging · Replenishment · Physical Inventory · Integration with SAP ERP · Sales Order & Delivery Processing · Pricing and Billing · Returns · SAP ABAP · OData · SAP Fiori & UI5

CERTIFICATIONS

- SAP Certified Application Associate — SAP S/4HANA Sales 1909
- SAP Certified Application Associate — SAP S/4HANA Cloud, Sales Implementation 2021
- SAP Certified Application Associate — SAP Extended Warehouse Management 9.5

- SAP Certified Application Associate — SAP Transportation Management 9.5
- SAP Certified Development Associate — SAP Fiori Application Developer
- SAP Certified Development Specialist — ABAP for SAP HANA 2.0

EDUCATION

Bachelor of Engineering — Electronics & Communication

MITS, Gwalior · 2011 – 2015 · First Class (Hons), CGPA 8.36
